Individual Rights and Freedoms

Policy

Bethesda is committed to assist each person receiving services in exercising their rights and responsibilities. Bethesda recognizes the fact that people receiving support have the same basic fundamental rights as all community citizens. These rights include but are not limited to the right to freedom from unlawful discrimination based on culture, age, gender, sexual orientation, spiritual beliefs, socioeconomic status or language. Bethesda recognizes that with each right there are generally accepted responsibilities. The person's Circle of Support Team has the responsibility to annually review the issue of individual rights to determine if any modifications are necessary. The review will be documented on the person's Rights Checklist. Any modifications of the person's rights must be approved by the Support team and must have informed consent from the person receiving services or their legal guardian. Where a restrictive practice is required, a Safety Plan must also be developed by a qualified Behavioural Consultant. Restoration of a right must be documented in the person's 'Person Centred Plan' (PCP).
